

Submitter: Ana Sofia Knutson

On Behalf Of:

Committee: Joint Committee On Ways and Means Subcommittee On
Natural Resources

Measure, Appointment or Topic: HB5009

Our forests and wildlife are critical in so many ways and we must support them. Nature is scientifically proven to help improve mental health. Accessible wildlife areas provide beautiful and peaceful areas to relax, recreate and exercise : often for free! They support important habitats. And our forests foster tourism with the diversity and wonder they offer. I see no reason to oppose supporting this measure and write to express my strong support.
