Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Why? Why go back to the burdensome process of in person voting on a single day? This bill makes no sense. What other conveniences would this legislator like to get rid of next? All water must be delivered by hand driven pumps? In all seriousness though, in person voting disenfranchises many people such as those who can't leave their job, those who don't have access to transportation, and those who are sick on the day of voting to just name a few cases. Please vote no on this backwards bill.
