Measure, Appointment or Topic:

SB210

I support this bill because I believe requiring in-person voting will help prevent fraud when we vote. Then the only way to corrupt the vote would be during counting. If the person voting has to show ID it would be even better. If the percent of people voting goes down it would only be because illegal votes would be eliminated. You could still provide mail in votes to people who could adequately prove they are the person requesting the ballot. The loss of faith in the, note I did not say our, government is huge in this country. We need to at least believe that our vote counts and we are not voting against computers and people who have no right to vote.
