Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Thank you for taking my opinion.

Venezuela voted itself to 3d world status. Hugo Chavez used vote fraud to do it. Venezuela was a successful country and then within 20 years it wasn't. They had a middle class, jobs and an acceptable amount of freedom. Hugo Chavez destroyed a functioning experiment in government with vote fraud. We need not follow that example.

Elon Musk just showed one of many examples of vote fraud. Illegals get Social Security numbers, then get benefits, then get vote registration and then they vote. Do they vote for freedom, or more freebees. People who want vote fraud helped them. There are many people who want vote fraud. We need to stop them.

Vote by mail has been exposed as an invitation to open the gates of vote fraud. The investigations proving vote fraud are scary.

We can vote ourselves to 3d world status if we allow vote fraud to continue or we can vote to keep America the greatest experiment in self government ever.

Thanks
