

Submitter: Robert Egner  
On Behalf Of: Law Abiding Constitutional Americans  
Committee: House Committee On Judiciary  
Measure, Appointment or Topic: HB3884

I am writing in opposition of this bill because I don't believe it is about keeping anyone safe. This bill is government over reach at its core. This bill on its face screams registration of and documentation of law abiding citizens firearms, storage, and the people or families they find loyal or safe thereby granting further information for governmental controls . This Screams infringement on the right to self defense. Screams the start of a national and state registry.

It is like one massive data mining bill !!

The government doesn't need access to liberty minded Americans firearms nor does it need a government issued permit process complete with a burden on the gun owner to "provide a safe place" for their own property ( firearms ) to go. Nor do citizens need to grant the government the option to simply go into a person's home and distinguish if the firearms owner has adequate storage for their firearms or the proposed firearms holder has adequate storage options, space etc...

The state is asking We the People to provide proof that we have someone capable of taking our firearms and placing that burden on our families to literally protect ourselves? For the self defense of ourselves and our families? Hard Stop on this ridiculous agenda !!

Free men and woman do not need the permission of their government to the undeniable right to defend ourselves !! I will not ask permission for this right !! I will not allow my government to tell others they need permission for this right !!

Our constitution and the amendments that are written are not the rights granted to the people by the government !! If you read the Federalist Papers by the founders of our sacred national documents, our founders are very clear that their intent is to tell the government what they "can not" do to the free people of this nation !!

It would stand to reason the writers of many of these firearms bills meant to disarm the people of this nation and state brush up on the history of our founding documents prior to trying to administer unconstitutional and irrational bills.

Vote NO on HB 3884 !
