Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Hello,

I am 100% opposed to making in person voting the standard. With the continued economic state pushing many people to have to take on multiple jobs just to meet the standard of living, and growing health & safety concerns (covid, measles and possible bird flu), moving to in person should be considered nothing if not voter suppression. Many people do not have the time or luxury to spend potentially, hours to vote without great cost to themselves. Beyond this, in person voting, like all ways of voting, comes with its own problems. One of which is imposed intimidation. No one should be made to feel the uneasy brought on by those around them that may disagree, simply because the area they live in or location they have to vote from.

If the true concern is identity verification then we should be investing in secure digital methods. Ones that verify both photo id and facial recognition, with a digital encrypted pin that is assigned. We live in an age of technology where all of these things are possible in the palm of our hand. We merely need to utilize them. With that said , I do NOT believe anyone should be subjected to the social or economic issues brought upon by in person voting. And I implore the Senate Committee to oppose this measure whole heartedly.

Thank you.
