This is a MUST! Once the Democratic party removed the in-person voting from the state in 1987, it was OVER for and type of Republican control to ever see the light of day again. It's not just been Oregon though. ANY state that has removed the one day voting magically became PERMANENTLY Democratic controlled just like Oregon. Anyone with brains knows this. This state used to switch back and fourth between party control ---> UNTIL <---- the mail in balloting became a law.
