Measure, Appointment or Topic:

SB210

This proposed bill is yet another waste of time and money. The people voted on this issue decades ago. They WANT MAIL IN VOTING. It is safe, secure, and allows for more citizens to exercise their right to vote in this country. The Republicans continuously propose to limit voting because they merely are only able to come up with unpopular stances and thus they know the only way to get any of their ideas passed is by limiting voting. They should perhaps look deep into their souls and propose legislation that helps people instead of hurting them. Pretty simple concept that continuously escapes their logic.
