House Committee On Education

Measure, Appointment or Topic:

HB2583

My child chose a virtual charter school because it best suited his needs and learning style. He has thrived in his online charter school and it has opened up opportunities for him that would otherwise not be available. I believe every child deserves equal access to education funding, regardless of their school type. HB 2583 ensures students like mine get the resources they need to succeed—just like their peers in traditional public schools. Education should be fair for all Oregon students, and virtual education with dedicated professionals in our charter schools is allowing more students to succeed educationally, especially those who would not be successful in a traditional public school.
