

Submitter: Erika Moore

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB2583

My children are thriving in a virtual public educational setting and should have the same access to funds that students in traditional public schools have. We live in a world where there are options to adequately accommodate learning styles and environments, and HB2583 offers support for those choosing the route that works best for their child. This is for the betterment of the student and our future generations.
