

Submitter: Jennifer Abele

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

The oil and gas industry continues to cause harm in this state. Wildfires are becoming larger, more dangerous, and more deadly. I support a fund to help deal with these devastating effects of climate change, especially if it eats into the profits of oil and gas companies. Are these companies likely to raise prices to deal with this? Yes. And ideally people can responding by demanding that less of our infrastructure is dependent on oil and gas, finite resources that will eventually deplete, and increase the use of renewables.
