SB210

I strongly oppose this bill to change the method of voting in Oregon. The current system works with the occurrence of fraud relatively minuscule.

Mail-in ballots allow people who have difficulty getting to polling places a better chance of voting. Those who have disabilities or who care for family members with disabilities have enough problems with everyday life without having to find time to go to a voting site, stand in line and fill out ballot. I for one know that as a parent of children with disabilities, I have taken a couple of days to fill out my ballot because something "comes up" in the middle.

The current system is not broken and those trying to fix it are those who **WRONGLY** believe the **BIG LIE**.
