SB210

The repeal of the current statute allowing vote by mail has worked well since it was enacted. It allows more people to vote without taking time off from work, find transportation to and from the polls, stand in line sometimes for hours, and accommodates the handicapped. It is especially important to have the ability to vote by mail for seniors and handicapped without having to go through the process of applying for an absentee ballot. My thought is, "if it ain't broke, don't fix it" I adamantly oppose the proposed bill. Thank you.
