Measure, Appointment or Topic:	SB210

Mail voting has been in use since it helped soldiers cast ballots during the Civil War. Mail voting has been increasing in usage since the 1980s, with unprecedented expansions taking place since the COVID-19 pandemic. Mail voting is a safe, secure, and reliable voting method used by voters of all political parties. We should not allow propaganda and misinformation to take away what ensures everyone is able to participate in our democracy. Mail in voting supports accessibility and inclusivity for all. Imagine being a new parent with a newborn at home, or someone in the hospital during the election, or someone whose medical condition does not allow them to vote in person. We must preserve mail in voting and support voting privilege for all.
