Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Requiring voting in-person is a common tactic by the fascist right wing to disenfranchise voters and prevent working class people from being able to vote, they do this because they know they won't win without preventing people from being able to vote.

Instead of changing their policies to reflect the struggles Americans face on a daily basis, they want to take away our rights so that they can continue to oppress us. This idea is a terrible power grab and should be thrown out.
