

Submitter: J Carriveau
On Behalf Of: THIEVES USE SCANNERS ALREADY
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: SB416

With the rise of contactless payments and the increasing prevalence of RFID and NFC technology in everyday use by people, there's a growing concern about "skimming" or electronic pickpocketing, where thieves can steal data from your cards without you even realizing it. The cartels and some of the major gangs already have the equipment which they carry in backpacks, which can read Drivers Licenses, permits, credit cards, your phone and all its contents, etc. They only need walk by you and their equipment can "read" all of your information/passwords, etc.

With this theft vehicle increasing in use all over America, WHY would you want to design a bill which will only INCREASE the likelihood that our information will be stolen?

There are other provisions of this bill that are also DANGEROUS. Perhaps Senator Woods should do a bit of study before he comes up with anything else like this!!

Please dump this bill
