Committee:

House Committee On Education

Measure, Appointment or Topic:

HB2583

As a parent of both a charter student and a brick and mortar local school student, I can clearly see that not every student thrives in the same situations. We need to allow/enable/encourage educational innovations that enable us to better serve students. If you give every school similar funding then the student/parents will demonstrate the best use of the state funding for their student instead of artificially limiting innovation by denying it equal funding. HB 2583 ensures students get the format of learning they need and don't get short changed because they don't fit the standard model. Let's make education fair for all Oregon students."
