

Submitter: Linore Blackstone

On Behalf Of:

Committee: Joint Committee On Ways and Means Subcommittee On
Natural Resources

Measure, Appointment or Topic: HB5009

HB 5009. Please fund. It is apparent that ODFW practices target management instead of protection. It just might be time in this state to start protecting our lands, our wild beings, our people. We have a malignant force in the White House. Time to use states' power (as, ironically the Republicans were, I say were all for when they didn't want a particular federal law to benefit us all, including the natural habitats and wild life.)

So let's start, now. If we wait, the take over is so damaging, you know, like unchopping a tree, that we can't repair or reclaim our natural world and it's living beings.

Fund this; the false equivalency should not be in operation when it comes to our earth and its life.

Thank you.
