SB210

Democrats have rigged the system through mail in ballots. They have developed so many ways to cheat. They can claim Oregon has the cleanest voting. I understand that by law unused ballots are supposed to be destroyed within a limited time. In the past that didn't happen, is the state still not destroying unused ballots. Did those unused ballots turn up in a trunk in Multnomah County after it was known how many ballots they needed to win?

You can see how knowledge of voter fraud has jaundiced my opinion on vote by mail. So many ways to take away non Democrat votes. This state only does what benefits the left. This public comment is like spitting in the wind.
