

Submitter: Journie Gering

On Behalf Of:

Committee: Joint Committee On Ways and Means Subcommittee On  
Natural Resources

Measure, Appointment or Topic: HB5009

As an Urban Planner working in the state of Oregon I support the Private Forest Accord. We must think about the health of our natural environment and in turn our cities. While this accord provides significant new protections for fish and stream-dwelling frogs and salamanders, it also support the health and safety of Oregon residents who rely on their local watersheds. This accord will also support the overall fishing and tourism industry, making sure that the salmon population is better protected for future generations to enjoy.

Thank you
