SB210

Given the increased opportunity for anonymity in modern communities, especially in larger towns and cities, citizens are not able to hold one another accountable as easily as in times past, leading to increased fraud and other crimes. It is common sense to require elections to be held in a way that MOST reduces the opportunities for fraud. Mail-in ballots were a bad experiment, are an expensive convenience, and INCREASE opportunity for fraud. NO AMOUNT OF CONVENIENCE was worth that tragic trade-off. PLEASE restore citizens' right to the MOST SECURE ELECTION possible.
