Measure, Appointment or Topic:

HB2583

Virtual charter students should receive equal access to the same resources as public school students. Public school is not a one-size-fits-all model that works for every family, and no one's children should be penalized for pursuing an alternate school choice. Charter schools are simply a better fit for some kids' learning styles. Virtual charter students should not be unfairly excluded from educational opportunities that equal funding would provide. HB 2583 is about fairness, and it ensures that all students have access to equal funds, regardless if they attend a charter school or public school. I strongly support HB 2583.
