

Submitter: Kathryn Linzey

On Behalf Of:

Committee: Joint Committee On Ways and Means Subcommittee On
Natural Resources

Measure, Appointment or Topic: HB5009

It seems like such a small matter, logging up to a water feature's edge, but it really is devastating.

Like a preventable fire that destroys hundreds of homes, logging in this fashion should be eliminated when possible - and it is possible.

A plan needs to be submitted to the Federal government by 2027; let's make that happen. It seems a ways away, but time and research and evidence need to be prioritized right now to make this a reality in time for submission.

This bill is a great first step. Please support these efforts and show that we really do value our natural treasures here in Oregon.

Thank you.
