

Thank you for your time and effort,

I'm writing this to submit testimony in favor of in person voting. This past election we watched as mail tampering occurred by setting fire to ballot boxes and the destruction of boxes in effort to remove ballots. As well as fraud by voting with illegal immigrants through dmv registration. This alone is reason enough to move back to in person voting. But I understand that deceased/departed people's of Oregon have continued to vote. This is fraud to the highest levels as far as I'm concerned. Even if it makes no difference in the outcome we should feel confident that no tampering occurred. We have seen votes come very close. This could make the difference.

Thank you,
Devin Hosking
