

Submitter: Ray Gertler
On Behalf Of: Third Act Oregon
Committee: Senate Committee On Energy and Environment
Measure, Appointment or Topic: SB1187

I am a long-term resident of Bend Oregon. I am very supportive of SB1187 and feel strongly that fossil fuel companies bear responsibility for the damage caused by their fuels in the form of wildfires, clean-ups, etc. It should not be the sole responsibility of the public to have to address the damage done . Every year we see the direct relationship between green-house gases and the damage to the environment . Living in Central Oregon , the impact of wildfires is dramatic and worsens every summer.
