

Submitter: Frances Shields

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

This bill is being proposed under a spurious presumption of voter fraud and is designed to limit citizens' access to voting. No substantiated evidence of voter fraud has been provided to support any consideration of modifying existing regulations and safeguards. Current registration procedures, both online and in person, already require in-person proof of eligibility. Current voting procedures already include the means to positively identify the voter's ballot.

I am a senior. Specific concerns and limitations this could present to seniors include weather on voting day, access to transportation, standing in line for an excessive amount of time, and certainly unforeseen immediate changes in health that would prevent me and others like me from making an appearance on voting day. Vote by Mail is a safe and fair way to ensure those with the right to vote are not prevented from doing so.

"If it ain't broke, don't fix it!"
