Committee:	Senate Committee On Rules
Measure, Appointment or Topic:	SB210

Voting is a basic right for citizens of the United States. The Oregon voting system is designed to remove barriers to participation for Oregon voters. Oregon is a leader on this model and it has shown to be safe and resistant to fraud. By tying voter registration to the DMV, it is inherently and efficiently tied to valid identification requirements. By going back to the old polling method, it would not only reduce the efficacy and safety of the Oregon voting system, it would limit access to many Oregon voters. The proposed system would be easier to manipulate, present access and transportation issues and unfairly penalize voters. Please do not allow us to regress and compromise citizen's ability to vote and allow more opportunities for bias and manipulation.
