

Submitter: Alan Burns

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3729

As a co owner of Siuslaw Valley crematory I would support lowering the temperature. We perform over 450 cremations a year by lowering the temperature it would lower the emissions and particulates in our air. It would have a impact on the operator relating to working with each cremations. While all 49 states in this country allowing the change it truly should be allowed and with the neighbors (California and Washington) it should be approved. I assure you it will make a positive impact.
