Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I'm fully supporting SB 210 due to my experience. Just before the 2020 election, a friend posted a recommendation that his friends be certain that they were registered to vote. Since I hadn't missed a single election since registering just after my 21st birthday, in 1966, I thought this to be unnecessary but decided to check. When I went to the Oregon State Election website, I was surprised to find that I wasn't registered. After making a few phone calls, I found that, somehow, my birth date had been altered by over 30 years. Had I not checked, I would not have received a ballot. No, I don't feel completely secure with mail in voting and would wholly support 'in person' voting.
