

Submitter: Sigrid Girdner
On Behalf Of: myself and every living human being
Committee: Senate Committee On Energy and Environment
Measure, Appointment or Topic: SB1187

Children learn at the latest in Kindergarten: If you make a mess, you have to clean it up or at least help to do so. Why should taxpayers and local governments who have often been against fossil fuels for ages cover all the costs. They/We have known the results of using fossil fuels for a long time: climate damage, wildfires, floods, water pollution. The costs to protect the environment and the earth are staggering. It is only fair that SB 1187 will require that fossil fuel corporations provide funds to help cover these costs.

Sincerely, Sigrid Girdner
