

If they want to us to pay for the water that comes out of our own Wells, they can pay for the amount that we paid to get the wells drilled, they can now pay for the water pump they can pay for the wellhead, they can pay for the pressure tank, then they can pay for all the maintenance that comes with that pump in that well, then they can pay us rent on the property that that will is taking up even the well house in all of that, they want to try to regulate the resources that belong to the people of Oregon, they can start paying us for the infrastructure that we built, because legally to come on to private land they must have a warrant or they must have permission by the Constitution of the United States of America, so now let's see what they want to do... So if the state wants to measure our water output, or make us pay for water

from your own wellor land, that now makes the state of Oregon your water district, and if you have to pay a water district for water that means that that water district is responsible for any upkeep to make sure that you still have water, that means usually a meter and all the piping beyond the meter so anything that goes from the pressure tank back to the well and into the well would be the responsibility of the water district aka the state of Oregon if they're wanting to charge us for water coming out of our ground...

by our 4th Amendment Rights of The Constitution Of The United States Of America the state must have a permission, or a warrant to come on to our land, and to put a measuring device on our wells the state must have our permission, if you're going to make this mandatory that means the state haa to pay all the these fees, the

pump all the piping to the pump the pressure tank a meter the state wants put on it, so all of the infrastructure that we have already put in you must pay us back for, the state must pay us rent for the well space, rent for the state coming on to the property, if they want all of the cost that come with the price of taking over the infrastructure and trying to control people on THEIR OWN PROPERTY, then we the people may discuss this..
