

Submitter: Lois Dorland

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: SB723

Please very carefully consider supporting two man crews as stated in SB 723. It is so dangerous for a one man crew with no support in case of any kind of emergency. It is just common sense (not some politicians definition of common sense) but actual common sense that it is so much safer for railroad employees to have another pair of eyes and ears to look for and help with anything out of the ordinary on any given day. There could be catastrophic consequence if an emergency occurred with only a one person crew.

Thank you for your consideration and please vote for safety.

Thank you.

Lois Dorland, Family member of railroad worker.
