

Submitter:	G. Howell
On Behalf Of:	SB698
Committee:	Senate Committee On Judiciary
Measure, Appointment or Topic:	SB698

There is no violent crime that really counts other than gun violence. Victims who are stabbed, beaten, strangled, set on fire, struck with an ax, run over by a vehicle, etc. are obviously less dead than those who are shot.

Here's a fun idea boys and girls lets take a group who has been statistically identified as having a markedly lower level of criminality than even police and make sure we keep our thumb on them. Further, after correcting incorrect FBI stats we find that this group was involved in stopping around 51% of active shooters. Forget that this bunch has to go through a more intense law enforcement scrutiny than does a regular gun purchaser who still must go through Federal and Oregon State Patrol checks. This group needs to be brought to heel. We will likely get into hot water legally if we out right ban them so lets do this instead...

Create a patchwork of buildings, etc. and "adjacent properties" that are "supposedly" marked conspicuously as "No concealed carry" or "Gun Free Zone" (we'll find ways to make that difficult by putting the sign with numerous other signs below eye level on doors or the lower corner of a glass frontage) We won't exactly identify what adjacent areas count as gun free (sign behind tree)-if you are going to be a concealed carry gun owner it is your responsibility to have a county property ownership map of unfamiliar regions at all times - we suggest hiring a surveyor as well. We know that people who are criminals with already illegal guns will check to make sure they are in compliance which will deter crime.

See, we are geniuses.

Absurdity for Absurdity. SB 698 is absurdity...unless the goal is tyranny rather than crime prevention...then it is, indeed, genius.
