

Submitter: Donna Bonetti

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

The idea of a climate superfund is simple: if you make a mess, you should have to help pay to clean it up. Fossil fuel corporations, whose products have damaged the climate, should pay their fair share of the costs!

Right now, taxpayers and local governments cover the costs of wildfires and climate damage adaptation (such as flood protection, retrofits to electric power grids, water supplies, and waste-water treatment systems). This is not fair!

SB 1187 will require that fossil fuel corporations provide funds to help cover these costs. Please support this legislation that will help taxpayers and local governments by shifting the costs to those most responsible!

Thank you.
