---

Dear Committee Co-Chairs Campos and Valderrama, and fellow members of the Joint Ways and Means Subcommittee on Human Services,

I am providing this testimony in support of SB20 being fully funded within ODHS's budget.

I was in a car accident in 2013 leaving me paralyzed. For 8 years I did not work and lived with my parents due to the cap on income. As someone who needs these benefits and needs income to live, this SB would change the lives of people with disabilities and be able to thrive.

Becoming a Community Health Worker for Oregon Spinal Cord Injury has helped me gain back independence and to help others gain theirs back as well. As a CHW we are the support to others with spinal cord injuries new and old. We are advocates for them and organize events for people with SCI's to build a community.

Living with an SCI or any disability is extremely hard, dealing with the medical expenses and also not being able to provide for yourself or your family is discouraging. With this bill people can be able to afford both. Please take into consideration of those that are still able to work to take care of themselves and also be able to keep their benefits so they can live.

Thank you for your time!

A handwritten signature in black ink that reads "KBox". The letters are stylized and cursive.
