

Submitter: J Carriveau
On Behalf Of: HUNTING FOOD NOT PEOPLE at 18yo
Committee: Senate Committee On Judiciary
Measure, Appointment or Topic: SB697

I know many families, who out of necessity, hunt for their food during hunting season, and their sons are trained in how to use guns safely and appropriately. Looking at the data, the MAJORITY of gun deaths are committed by people over 21 years old, so this bill does nothing to help reduce gun deaths, and hinders families from gathering legally needed food.

Most of us work for a living, and augment food by hunting, we don't expect the state to feed us for "free", as so many other people do in this state. Why don't you stop all the free food to people who don't work and train them in proper gun handling and shooting and let them hunt for food, like we do. Your bills need to get at the root of the problems, not a bandage called CONTROL!
