"Courthouses and government buildings are targets for politically-motivated violence. For public safety and the health of democratic institutions, guns should be prohibited in these places."on municipal property – such as government buildings, court buildings, or adjacent grounds –."

Now using their own words. "Courthouses and government building are targets for violence." Thank you for pointing out the fact that where there is violence according to you, I should absolutely have the God given right to defend my family and myself, without limit, to keep my family and myself safe while at these places from the very people you mention that are already not following any written law during the time of their violence. This includes if I were to be walking in the "adjacent grounds" near these buildings that you also mention that I should be unarmed at those locations too! This is unacceptable as a law abiding citizen and father. As a law abiding citizen that hasn't even had a parking ticket in 40 years, I have a right to defend my wife and children from the violent people you speak of, even in the "adjacent grounds"!
