Senate Committee On Judiciary

Measure, Appointment or Topic:

SB696

If you give someone 10 rounds and a semi auto, they will be more accurate than someone who has 10 rounds in "rapid" fire. The more innacurate and the more they have ro reload. The more chances for them to be neutralized and for people to escape. There is a reason the military went away from full auto at the rifleman level... because they missed too often and used too much ammo.
