

Submitter:

William Keady

On Behalf Of:

Committee:

Senate Committee On Judiciary

Measure, Appointment or Topic:

SB698

I strongly oppose, there is no cost estimate, and no mention on how this is funded. None of this will actually make our state safer, it will only further restrict the rights of law abiding citizens. Criminals will always cause crime. Our constitution is still the law of the land, and shall not be infringed is still the verbiage in our second amendment. Our constitution is not rules for the people, it is rules for our government. The Tyranny that the elected officials of our state keep proposing, instead of keeping the oath they swore on to uphold our constitution must end. You took a sacred vow, and your personal thoughts and opinions about firearms should have little bearing on what you introduce as law, the most important consideration that you should have is whether a law or bill you are proposing is if it is constitutional or not. By even bringing this to consideration is disgraceful, and clearly shows the lack of integrity and moral character on the part of any and all elected officials who have allowed this to be presented. It is reprehensible that I am even writing this testimony.
