SB429

Imagine a world where you had to do a background check and wait 72 hours before you could speak in public, or vote, or practice your religion. The second amendment is not a second class right. Nowhere in the text history and tradition of the second amendment at the founding of our nation included waiting periods. Criminals don't have to wait when they buy illegal guns off the street. You can't stop the wolves by disarming the sheep. We all know this.
