

Submitter: Cynthia Vogt

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1102

Any further hikes to our electric bill will make daily life even harder for us. We are on both Social Security. Property taxes are bad enough. And we are better off than so many others. How will they heat their homes?

Our home is all electric. When it was built, the 'propaganda' was that rates would be low and affordable. We have the highest increases in the country. This is not sustainable! We cannot afford this. Last year's increase was bad enough. Our legislators need to work for the taxpayers and citizens of this state. Just look at California! Dismal to say the least.

Please don't make it any harder to barely get by.....
