

Submitter: Leigh Evans

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

My name is Leigh Evans and I am a resident of Portland, Oregon who cares deeply about the future habitability of our planet. We need to act yesterday, but the second best time is now. If we care about a livable planet for our children, grandchildren and all those who comes after us, we need to establish funds for climate resilience, adaptation, and mitigation across Oregon. The most logical source of funding is fossil fuel companies - they've known about the impact of their industry on the planet for decades and they should be the ones to pay to clean up the mess they made. Please support SB 1187. Humanity's future quite literally depends on the actions we take now, and Oregon has the opportunity to join a handful of other states as a leader in this particular action. I believe in Oregonians' power to do right by future generations.
