

Submitter: Tyler Flint

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3846

Public and wild lands are at the heart of recreation in the United States and are one of the key factors that make us stand out among nations. The only truly protected public lands that cannot be sold for development are those in Federal holding. We must protect this precious resource and keep it wild to maintain healthy wildlife and clean drinking water for the many nearby communities that depend on the mountain runoff each year.

Keep wild lands wild, and public lands in public hands.
