

Submitter: Virginia Jaschke
On Behalf Of: my family
Committee: Senate Committee On Energy and Environment
Measure, Appointment or Topic: SB1187

I am writing in support of SB 1187. It is clear that the fossil fuel industry has profited massively from activities that they full well understand are leading to catastrophic destruction of Earth's ecosystems. Has the human race really used its intelligence to come as far as we have, only to let our survival be compromised by those who care more about perpetuating their own immense wealth than taking care of the incredibly beautiful planet that God gave us? What possible argument can be made in favor of allowing the ultra wealthy fossil fuel magnates to continue pouring carbon into our atmosphere while ignoring our own health and safety and the health of our children and their children? Please look at the information available. Please think about what really matters. Please pass SB 1187.
