

Submitter: Jennifer Maffei  
On Behalf Of: Sierra Club  
Committee: Senate Committee On Energy and Environment  
Measure, Appointment or Topic: SB1187

Climate change is destroying lives, displacing people, and creating mass amounts of suffering, devastation, and economic upheaval. The earth is in a toxic tailspin. My 16-year-old daughter is so disheartened by the disregard and suffering, that she has no intention of having children. What kind of world will they live in? It's a frightening thought!!!
