

Submitter: David Chatelain

On Behalf Of:

Committee: Senate Committee On Natural Resources and  
Wildfire

Measure, Appointment or Topic: SB1154

A way to tax you or to control the use of you water. If you out of a area that doesn't have a water district you have no choice but a well. Or have it haul in. Now the state wants to control it. They already control the use farm irrigation water .if you can pump, how much,where and when. Do you really need to be control to water your garden or take a bath? I am retired from nursery that had 20 acres of containers. Use a lot of water. Recycled our water so didn't have to pump as much out of the ground. This was before you had to. What are the benefits of doing this? Other than controlling what you can and cannot do? And I am sure they want to put a fee on it to use your own water.
