

Dear Committee on Human Services,

As a parent of a human with IDD, I am asking for your support in funding the local FEATT. I have greatly benefited from the area and online education base that FEATT has to share. The families have been able build personal connections among the FEATT gatherings and this has strengthened the interpersonal supports. It is of such support to find out you really are not alone.

FEATT is a valued resource for families in our rural area they have come to rely on. The knowledge, commitment, along with emotional support and building connections within the families that participate in FEATT is of great value and so needed. Too many families have gone this route with so little help and support not knowing where to turn to find the needed info. FEATT has become the resource to offer that support in multiple ways.

Please support funding FEATT for the families in our area.

Regards

Nina
