

Submitter: Whitney Beebe

On Behalf Of:

Committee: Senate Committee On Education

Measure, Appointment or Topic: SB302

In a time where our nation's education system is being gutted, it is so important that we defend true history, science and the arts with all of our powers. This is an important and imperative part of maintaining an educated and well rounded population, and allows the state and nations people to make more informed decisions about their lives and the government that supports them.
