

Submitter: Whitney Beebe

On Behalf Of:

Committee: Senate Committee On Education

Measure, Appointment or Topic: SB581

If we the people are to be a healthy and positive force in our state and country, it is so important to have health providers of all kinds who understand the shared history of humanity, but also the differences in experience of each individual due to their ethnicity, origins, class, etc. More understanding of each other is never a negative outcome.
