

Submitter: Ruth Dallas

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1187

Dear Legislators,

I ask you no matter where you stand politically to support the health and wellbeing of your constituents and vote yes on SB 1187. Oregonians and people all over the world have suffered so much from our warming planet. Right now 1 in 8 deaths world wide is from air pollution much of it from wild fires due to temperature rise and extended droughts. Corporations will continue to pollute until their profits are reduced because of it. When they must pay some of the cost of pollution they cause their share holders will eventually find that their profits are reduced enough that reducing pollution will be more profitable than the costs saved by avoiding that pollution.

It is PAST TIME to hold polluters responsible for putting their profits before our health.

I thank you for all that you do for my fellow Oregonians.
